

# ROUNDUP

## COLLAPSIBLE COMPOSITE SPILL POOLS

The RoundUp is a spill containment pool that can be used for rail, truck, or any overflow or drips associated with pumping, filling, and storage of liquids. Its collapsible design makes it ideal as a portable decontamination pool for field personnel. The RoundUp features a single layer of triple wall corrugation, an outer layer of coated polypropylene and an attached inner liner.

### FEATURES & BENEFITS

- Available in two sizes - 27 and 90 gallon capacity
- Compact size and portability make the RoundUp ideal for emergency responders, who need quick containment capability for leaking tanks, vehicles, equipment and machinery
- Folds down to a compact size for easy storage and transport
- Fits easily in most vehicles
