

BULLDOG

COLLAPSIBLE COMPOSITE CONTAINERS

PackGen's BULLDOG low profile container is specially designed for durability and moisture resistance for the disposal of batteries, e-waste, and related materials. This container, now available in 2 standard sizes, is ergonomically designed and constructed of UV treated high density woven polypropylene over a single layer triple wall fiberboard, with a 6-mil low-density polyethylene liner. Our unique BULLDOG is rated for disposal of most varieties of batteries. Call (207) 784-4195 for help in determining if the BULLDOG is right for your specific needs.

FEATURES & BENEFITS

- Approved for handling a variety of batteries when used in accordance with the Hazardous Material Regulations. Questions? We can help. (207) 784-4195
