

Lapoint Packaging is pleased to introduce our all-new single-use liquid IBC. Our pop-up style totes offer an alternative to traditional corrugated totes, rental programs and bottle-in-cage. Proudly engineered and built in the USA.

- Skirted UV protected and water resistant cover over flexible truss offers easy access for drop-in liner cassette
- Woven recyclable PE exterior sheds splatters, is moisture and UV resistant and can be cleaned without damaging the core
- Pop-up composite body requires no additional assembly and takes only seconds to prepare for filling
- Move directly to your fill line up to 17 units at a time in a single stack - no pre-staging required
- Our direct-contact liquid liners are FDA and Kosher approved and IMS certified
- Compatible with automated filling equipment
- Available with or without bottom discharge valve

SuCore Construction for a Greener Footprint

The LP Liquid Tote's core is created from all-natural, highly renewable sugarcane byproduct. Our unique interior SuCore panels provide superior strength, while staying lighter and greener than traditional bulk liquid packaging.
