

Are EMPTY  
Drums and IBCs  
Jamming up Your  
Warehouse?

Replace ALL this ... with a single stack of  
LP Liquid Totes

18-20 275 gallon LP Liquid Totes per Stack

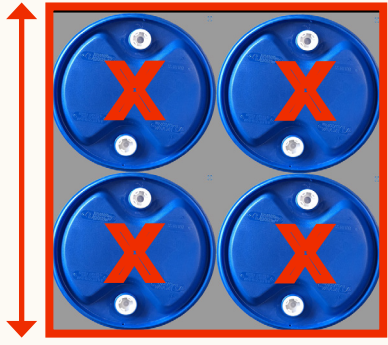

LP Liquid Totes by Lapoint Packaging contribute in multiple ways to our customers' bottom-line savings

From freight savings on inbound deliveries to labor and space economies, LP Liquid Totes are a simple solution to costly line items, all of which affect how competitive you can be when bringing your product to market.

LAPOINT PACKAGING ships 30% more units per inbound truckload of LP Liquid Totes than corrugated and other collapsible IBCs.

25% MORE  
PRODUCT  
PER PALLET  
VS DRUMS

LP INSIGHT

FLOOR SPACE REQUIREMENT FOR  
EMPTY CONTAINERS NEEDED FOR  
11,000 GALLONS OF PRODUCT

BOTTLE-IN-CAGE IBC - 275 gallon  
Units needed = 40  
Max stacking = 3 high → 14 stacks  
Footprint per stack = 47.25" × 39.5" = 12.98 sq ft  
Total floor space = 14 × 12.98 = 181.72 sq ft

DRUMS - 55 gallon  
Units needed = 11,000 ÷ 55 = 200 drums  
4 per pallet → 50 pallets  
Stacking = 3 high → 17 stacks  
Pallet footprint = 48" × 48" = 16 sq ft  
Total floor space = 17 × 16 = 272 sq ft

LP LIQUID TOTES - 275 gallon  
Number of totes = 11,000 ÷ 275 = 40 totes  
All 40 fit in a single 2-high stack  
Footprint = 79" × 38" = 20.84 sq ft

2. warehousing

Floor space, or lack there-of, can be crippling to your business. Bulky, rigid containers, which don't store compactly, reduce the amount of real estate that can be better dedicated to production activities and finished goods storage.

Our totes can be brought straight to your fill line in stacks of 18-20 units. Simply pop open and insert the cassetted liner — no additional assembly, and no extra space needed for staging required.

**Bottle-in-cage IBCs take up almost 9x more floor space and empty 55-gallon drums take up nearly 13x more floor space than the equivalent volume capacity of empty LP Liquid Totes.**

3. labor

With more containers per stack, your handlers will make fewer movements when unloading totes from inbound trucks, saving time and money.

Assembly and staging labor is eliminated, as are bin tracking, returns, rental accounting, washing and repairs.
